The RUSTIKOTTA system

The Rustikotta coating system from Tempio, is a traditional technique carried out in an ancient granite production process. Thanks to its high performance this product is resistant to extreme temperatures, acidic liquid and water-proof. The combination of natural stone and special effects on the surface contributes to give the coating a special texture.

El sistema de recubrimiento Rustikotta de Tempio, es un método de trabajo tradicional adaptado a un proceso de extracción más antiguo. Gracias a sus altas prestaciones es un producto resistente a temperaturas extremas, líquidos ácidos e impermeable. La combinación de el gran natural y de efectos especiales sobre la superficie aporta un toque especial al edificio.

INFO

1 piece or various pieces

Facing bricks, paving bricks, clinker brick slips and angle brick slips are coarse ceramic brick products. Raw materials or manufacture-related color, structure deviations and tolerances may occur. Samples and illustrations are therefore only approximate and are always non-binding average samples. Before laying, the clinker brick slips should be mixed thoroughly, as the size and color of the clinker bricks vary.
