# ENJOY THE BENEFITS OF CONCRETE With the look and feel of natural stone

## HORIZONTAAL LIJNENSPEL

GeoStylistix biedt u de kans om iets unieks te ontwerpen. Een extra lange, slanke en uiterst stijlvolle gevelsteen. Onderscheidend door kleur, formaat en textuur. Door de a-typische afmetingen is het mogelijk om een bijzonder horizontaal lijnenspel te creëren. De voordelen van beton, gecombineerd met de oogstrelende esthetische kenmerken van natuursteen. U zult aangenaam verrast zijn door de ontwerp vrijheid en de keuzemogelijkheden die GeoStylistix u biedt. U kunt de kleur van de natuurlijke mineralen kiezen en precies de gevel samenstellen die u voor ogen heeft.

## HORIZONTAL LINING

GeoStylistix offers you the chance to design something unique. A very tall, slim and extremely stylish brick. Distinctive in terms of colour, size and texture. Due to the a-typical dimensions, it is possible to create an exceptional horizontal lining for your facade. The advantages of concrete, combined with the aesthetic characteristics of natural stone. You will be pleasantly surprised by the design freedom and choices that GeoStylistix guarantees. You can choose the colour of the natural minerals to create the unique wall exactly as you envision it.

## HORizontales Linienspiel

GeoStylistix bietet Ihnen die Möglichkeit, etwas Einzigartiges zu entwerfen. Ein besonders langer, schlanker und sehr stilvoller Verblendstein. Unterscheidend in Bezug auf Farbe, Größe und Struktur. Aufgrund der a-typischen Abmessungen ist es möglich, ein spezielles horizontales Linienspiel für die Fassade zu kreieren. Die Vorteile von Beton, kombiniert mit den auffälligen ästhetischen Eigenschaften von Naturstein. Sie werden angenehm überrascht sein, von der Designfreiheit und Auswahl, die GeoStylistix garantiert. Sie können die Farbe der natürlichen Mineralien selber wählen, um präzis Ihre Fassade zu erstellen, die Sie vor Augen haben.

## Lignes Horizontales

GeoStylistix vous offre la possibilité de concevoir quelque chose d'unique. Une brique de parement extra longue, mince et extrêmement élégant. Distinctif par la couleur, la taille et la texture. En raison des dimensions atypiques, il est possible de créer un motif de trait particulièrement horizontal. Les avantages du béton, combinés aux caractéristiques esthétiques attrayantes de la pierre naturelle. Vous serez agréablement surpris par la liberté de conception et les options offertes par GeoStylistix. Vous pouvez choisir la couleur des minéraux naturels et assembler avec précision la façade que vous envisagez.

## VOORDELEN

- Toplaag is glad of gestructureerd
- Esthetische uitstraling van natuursteen
- Zeer geschikt voor metselwerk met dunne voegen (lijmtechniek en dunbedmortel)
- Stootvoegloos te verwerken

## VORTEILE

- Deckschicht glatt oder strukturiert
- Ästhetisches Erscheinungsbild von Naturstein
- Sehr geeignet für dünne Fugen (Dünnbettmörtel)
- Verarbeitung ohne Stoßfuge möglich

## ADVANTAGES

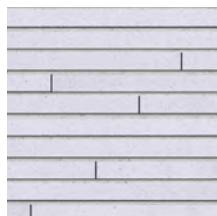

- Toplayer is smooth or structured
- Aesthetic characteristics of natural stone
- Very suited for brickwork with thin joints (glue and thin bed mortar)
- To assimilate without vertical joints

## AVANTAGES

- Couche supérieure lisse ou structurée
- Aspect esthétique de la pierre naturelle
- Très approprié pour la maçonnerie à joints minces (technique de collage et mortier de lit mince)
- Traiter sans joints verticaux

## **GeoStylistix**

### **MODERN AND STYLISH FAÇADE**

Since 1945 MBI has been the specialist when it comes to Dutch stone of high quality to create a better living environment; in quality, durability, colour and shape. Functional and aesthetically pleasing bricks and blocks for creating the most beautiful architectural constructions.

## **GeoSteen®**

As you may already know MBI is the inventor of concrete tiles and bricks with a unique top layer comprised of high-quality materials selected for their natural colours. This involves making a base consisting mainly of natural granulates. These stones have many benefits including being available in larger sizes, having more attractive colour nuances and improved colour stability over a longer period when compared to conventional concrete. And they also have better practical properties than natural stone. Moreover, these products are more attractively priced. The collective name for this contemporary and innovative MBI product is: GeoSteen®. When you encounter the term 'Geo' in a product description, you now know that there is always an exceptional story hiding behind the eye-catching surface!
